AICAP Legacy System Integration Discovery

Purpose

Determine whether AICAP can transfer completed application data into the major credentialing platforms used by hospitals and health systems.

The goal is to understand what is possible, what constraints exist, and what future integration options may be available.

Systems to Evaluate

- Symplr
- MD-Staff
- VerityStream CredentialStream

Questions to Answer

1. Can application data collected by AICAP be transferred into these systems?
2. What methods are available?

Examples may include:

- API
- Import
- File exchange
- Other supported mechanisms

3. Can externally supplied application data be processed through the platform's normal workflow?

701 E Franklin St, Suite 105 1524
Richmond, VA 23222

AI-Credentialing Application Completion for Healthcare Systems

4. What authentication, attestation, audit, or governance requirements would affect integration?

5. What practical integration options appear available to AICAP?

Deliverable

A written summary describing:

- What appears possible
- What appears impossible
- Major risks or constraints
- Available integration options
- Recommended next steps

Cost & Timeline

To be provided by contractor.
